Introduction

Advantech's PCIE-2230 is a low-profile quad port 10GbE Ethernet PCI Express server adapter based on the Intel® XL710-BM1 Ethernet Controller. By supporting a PCI Express Gen3 x8 host interface, this adapter provides sufficient bandwidth for line rate traffic on all four 10GbE ports. Quad SFP+ ports can be configured to support a variety of optical transceivers such as 10GBASE-SR and 10GBASE-LR optical modules as well as directly attached cables. Improved support for virtualization, including VMDq, SR-IOV, and VEB, makes the PCIE-2230 a perfect fit for virtualized environments and applications with network overlays. Packet filtering, load balancing, and protocol offload capabilities further enhance efficiency by saving valuable processing time on the host.

PCIE-2230 is an ideal network interface solution for multi-tenant environments, network function virtualization, and networking applications such as WAN optimization and cyber security.
